ASX Limited  
Level 8, Exchange Plaza  
2 The Esplanade  
PERTH WA 6000

Dear Hayley,

Technology Metals Australia Limited (ASX: **TMT**) ("**Technology Metals**" or the "**Company**") requests a trading halt of its securities pursuant to ASX Listing Rule 17.1 pending the release of its Maiden Inferred Resource Estimate.

The Company requests that the trading halt be effective immediately and remain in place until the earlier of the commencement of normal trading on Wednesday 14 June 2017, or the release of an announcement in respect of the Maiden Inferred Resource Estimate.

The Company is not aware of any reason why the trading halt should not be granted.

*For, and on behalf of, the Board of the Company,*

**About Technology Metals Australia Limited**

**Technology Metals Australia Limited (ASX: TMT)** was incorporated on 20 May 2016 for the primary purpose of identifying exploration projects in Australia and overseas with the aim of discovering commercially significant mineral deposits. The Company's primary exploration focus is on the Gabanintha Vanadium Project located 40km south east of Meekatharra in the mid-west region of Western Australia with the aim to develop this project to potentially supply high-quality V<sub>2</sub>O<sub>5</sub> flake product to both the steel market and the emerging vanadium redox battery (VRB) market.

The Project, which consists of five granted tenements and one exploration licence application, is on strike from, and covers the same geological sequence as, Australian Vanadium Limited's (ASX: AVL) Gabanintha Vanadium project. Vanadium mineralisation is hosted by a north west – south east trending layered mafic igneous unit with a distinct magnetic signature. Mineralisation at Gabanintha is similar to the Windimurra Vanadium Deposit, located 270km to the south, and the Barambie Vanadium-Titanium Deposit, located 155km to the south east. The key difference between Gabanintha and these deposits is the consistent presence of the high grade massive vanadium – titanium – magnetite basal unit, which is expected to result in an overall higher grade for the Gabanintha Vanadium Project.

The Company will also review the potential for economic mineralisation of various other commodities at Gabanintha and intends to seek, evaluate, review and if appropriate acquire interests in additional resource based projects with a focus on technology and precious metals.
