

Climate Change and Emissions Policy

Document Number	TMT-ENV-POL-002	Effective Date	28 March 2023
Document Revision	1	Approved By	Board of Directors
Document Owner	Corporate/Board		

1. Purpose

Technology Metals Australia Limited (the **Company**) accepts the scientific position on climate change and recognises the global challenge climate change poses to governments, businesses, and communities worldwide.

Successful mitigation and adaptation to climate change requires a collaborative approach. The Company is committed to being part of the solution by demonstrating leadership in minimising the impact of its activities on the environment and increasing energy efficiency to reduce its greenhouse gas emissions.

This policy will provide guidance to the Company in its approach to the management of greenhouse gas emissions when undertaking exploration, operational and closure activities.

2. Scope

The Company expects that the effective management of greenhouse gas emissions in undertaking its activities is supported and followed by all directors, employees, and contractors working for the Company and its subsidiaries.

3. Responsibility

- The Company's Board is responsible for the overall governance of this Climate Change and Emissions Policy.
- The Managing Director is responsible for implementation of the commitments set out in this Policy.

4. Policy Commitments

The Company is committed to:

- Measurement and reporting of greenhouse gas emissions in line with relevant policies and legislation in the jurisdictions in which the Company operates.
- Identification of cost-effective measures to improve energy efficiency in its operations.
- Development and implementation of emissions reduction initiatives.
- Incorporation of climate change risks into decision making and business operations.
- Review and continuous improvement of this policy to ensure it remains relevant and appropriate to the Company's activities.
